## **DETAILED ACTION**

### ***Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted:

Group I, claims 33-47, drawn to a rapidly disintegrating oral controlled release pharmaceutical composition comprising at least one active ingredient, and a polymer<sup>4</sup> system comprising at least two polymers.

Group II, claims 48-52, drawn to a process for preparing a rapidly disintegrating oral controlled release pharmaceutical composition comprising at least one active ingredient, and a polymer<sup>4</sup> system comprising at least two polymers.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The common technical feature of the above groups is the rapidly disintegrating oral controlled release pharmaceutical composition of claim 33. This element cannot be a special technical feature under PCT Rule 13.2 because it is not novel. Lorenzo-Lamosa et al (Journal of Controlled Release, 1998) discloses a peroral pharmaceutical composition (a rapidly disintegrating oral controlled release pharmaceutical

composition) with colonic drug delivery. The system consists of chitosan microcores (bioadhesive polymer) entrapped within acrylic microspheres made of Eudragit L-100 or Eudragit S-100 (acid insoluble polymers). Sodium diclofenac is used as a model drug (abstract). No drug is observe in a medium with  $\text{pH} < 7$  whereas the drug is released continuously at  $\text{pH} = 7.4$  (Figure 4). The composition of Lorenzo-Lamosa et al reads on and anticipates the composition of claim 1.

Since the inventions do not contribute a special technical feature when viewed over the prior art they do not have a single general inventive concept and so lack unity of invention.

### ***Rejoinder***

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product

are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

#### ***Inventorship Notice***

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
